## THE INKA GRILL

Our steaks and the meat that goes into our kebabs are cooked in the Inka oven to give them that special flavour and delicious texture.

The Inka oven is an enclosed barbecue which means that the natural sugars in the meat do not caramelize in the way that they would if cooked within a pan. The meat is served with the traditional bar marks and has a nice red hue. This can make the steak look undercooked, when in fact it's the wood smoking effect that gives it the unique flavour from the charcoals of the Inka.
